

MAX AutoSO Print Packing Lists

Function: AutoSO is a monitor program which automatically prints Packing Lists for orders which have due dates = today's date.

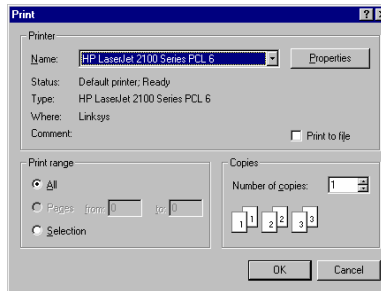

Requirements: Pervasive Client must be installed and MAX for Windows (or at least the registry pointer to the data).

Installation: Run Setup.Exe from Windows and follow the prompts.

Run: Execute AutoSO by clicking on the installed Icon. The application will look in the Registry for the location of the MAX data.

- The Printer to be used for the Picking Lists is selected by clicking on Activity/Select Printer

- Cycle Minutes is used to set the interval for checking for Orders to print in minutes.
