

ID Changer for MAX

Your business is in a constant state of change. Make easy work of numerous ID changes in MAX using ID Changer!

ID Changer for MAX can easily change Part Numbers, Customer IDs, Vendor IDs, Work Center IDs and all related open and historical records. This tool gives you the flexibility to choose from three methods to update these records based on your given needs. You can quickly and easily:

One record at a time | Change one single record.

Assign New IDs to multiple records | Update all records assigning new sequential IDs incremented by the value you specify.

Update a batch of records | Update a list of records using a text file to update all related current and historical MAX tables with new record changes at the touch of a button.

ID Changer for MAX solves the specific issue for when master records and all related transactions and documents need to be changed. Those records include Part, Customer, Vendor and Work Center IDs.

Features

- **Flexibility** | Conform to new naming requirements, change IDs to match customer and vendor name changes, merge duplicates.
- **Integration with MAX ERP** | Change what you need without impacting other data.
- **Security** | Retain previous values in the database for reference.

Benefits

- **All-Inclusive Updates** | Part Numbers, Customer IDs, Vendor IDs, and Work Center IDs and all related data and transactions in all MAX tables are updated with one easy process.
- **History of Updates** | The previous ID is stored in the database for reference.
- **Data Integrity** | The integrity of the MAX database is maintained.

Remove unnecessary restrictions, reduce effort, and take control to change existing IDs with ID Changer for MAX!
