

3 Site Inventory Viewer

Purpose: this application will display a summary of inventory information by Part ID from three MAX databases.

Installation: InstallConsInvViewerSQL.MSI.

The image shows two screenshots from the MAX Consolidated Inventory Viewer application. The left screenshot displays the 'Data Sources' window for Part ID 11000, showing inventory data from three databases: BPTBASE1 | ExactRMSAM, TIMSLAPTOP2008\TIMSLAPTOP2008 | ExactMAXSAM, and BPTBASE1 | ExactRMSAM. The right screenshot shows the 'MAX Data Settings' window, which allows configuration for three MAX Data sources (MAX Data 1, MAX Data 2, and MAX Data 3). Each source is configured with a Server Name, SQL Server Authentication (User: sa, Password: masked), and a DataBase (ExactRMSAM or ExactMAXSAM). A 'Test' button is provided for each source.

Data Sources

PartID: 11000

BPTBASE1 | ExactRMSAM

StockID	OnHand	Allocated	Sched<2 Wks	Sched>2 Wks
FGI	4,799.00	5,547.00	4,444.00	0.00
RMIOVER	2.00	0.00	0.00	0.00
CON	12.00	0.00	0.00	0.00
Total OH:	4,813.00			
Net	3,710.00			

TIMSLAPTOP2008\TIMSLAPTOP2008 | ExactMAXSAM

StockID	OnHand	Allocated	Sched<2 Wks	Sched>2 Wks
FGI	29.00	76.00	2,267.00	100.00
RMIOVER	2.00	0.00	0.00	0.00
Total OH:	31.00			
Net	2,322.00			

BPTBASE1 | ExactRMSAM

StockID	OnHand	Allocated	Sched<2 Wks	Sched>2 Wks
FGI	4,799.00	5,547.00	4,444.00	0.00

Select 2 or 3 MAX databases.

Double click on the PartID field to display the part browser. Select the part by clicking on checkbox.

The image shows the 'Part Look Up' dialog box. It has a 'Look Up Key' section with a dropdown menu set to 'Part ID' and a 'Value' field containing '11000-00'. Below this is a list of parts with checkboxes and columns for Part ID, Description, and Database.

Part Look Up
